Installation Guide

1. Theme Installation
Make sure you are in back office of prestashop and had disabled performance setting.

To disable perfomance setting . Please click on "Advance Parameter > Perfomance"

Here, you need to choose "Force compilation" for "Template compilation" and "no" for cache. At last save it.

First of all install Template Installer module and click on configure link. In "import from your computer" you need to select your installation zip file and click next .

Go step by step with default configuration of prestashop until you reach in final step.

If you do not have "Template Installer" module . Please download from this link http://addons.prestashop.com/en/front-office-features-prestashop-modules/1713-template-installer.html

2. Theme Setting

Click on preference > Themes

Here, you need to make default left column in promagazine1.0 theme
